> Bloomin' Brands Announces 2020 Q1 Financial Results Company Prices \$200 Million Convertible Notes Expects Sales to Strengthen As Dining Rooms Re-Open

**TAMPA, Fla., May 8, 2020** - Bloomin' Brands, Inc. (Nasdaq: BLMN) today announced a business update related to COVID-19 as well as first quarter 2020 financial results.

#### Statement from David Deno, Chief Executive Officer

Our priorities remain unchanged as we continue to address these challenging times. We are focused on taking care of our people and serving food in a safe environment that protects both our Team Members and customers.

Since the beginning of the pandemic and closing of our dining rooms on March 20th, we have leveraged our strong off-premises business. As a result, we have tripled our average off-premises sales per restaurant since the beginning of March. We have begun reopening dining rooms as state and local governments allow. We have 355 restaurant dining rooms opened with limited seating capacity across multiple states as of Thursday evening. Early results have been promising.

As these dining rooms reopen, we are adhering to the strongest of safety measures, including additional sanitation and disinfecting practices, enhanced hand-washing protocols, use of gloves and facial protection of our employees, and we are providing contactless payment options for our customers. In addition, each dining room seating configuration has been modified to adhere to social distancing and reduced capacity standards, and we are leveraging our table management notification system to allow guests to wait in their cars for their table.

Concurrently, we took steps to further strengthen our liquidity position through the issuance of \$200 million convertible notes. In addition, we expect our weekly cash burn rate of \$6 million to \$8 million to improve as dining rooms continue to open. These funds and our reduced burn rate provide us with additional flexibility to navigate economic uncertainty over the medium to long-term.

As it relates to our first quarter results, we were on track to deliver a strong quarter prior to the impact of the pandemic. The strategies to enhance Total Shareholder Return that we outlined on our Q4 earning's call were working. Through February all of our concepts were positive in sales and traffic. We achieved meaningful expansion of our adjusted operating margins during those eight weeks, and we had begun to see the benefits of our expected \$40 million of cost savings that we outlined in February. Once we have successfully navigated the ongoing crisis, we believe that we will be well positioned to build on our early 2020 success and emerge a stronger company.

#### **Convertible Notes Offering**

On May 6, 2020, we announced the pricing of a \$200 million convertible senior notes offering. In connection with the pricing of the notes, we entered into convertible note hedge and warrant transactions to mitigate future dilution of our common shares. We expect to close the transaction today subject to customary closing conditions.

## First Quarter Preliminary Diluted EPS and Adjusted Diluted EPS

The following table reconciles Preliminary Diluted earnings per share attributable to common stockholders to Preliminary Adjusted diluted earnings per share for the first quarter 2020 ("Q1 2020") compared to the first quarter 2019 ("Q1 2019"). EPS information in the following table remains unchanged from the information provided in our May 5, 2020 press release.

	 Q1				
	2020		2019	CI	HANGE
Diluted earnings per share attributable to common stockholders	\$ (0.44)	\$	0.69	\$	(1.13)
Adjustments	0.58		0.06		0.52
Adjusted diluted earnings per share	\$ 0.14	\$	0.75	\$	(0.61)

See Preliminary Data and Non-GAAP Measures later in this release.

For additional context, our first quarter adjusted diluted earnings per share results included \$16 million of relief pay provided to hourly employees impacted by the closure of our dining rooms.

#### **First Quarter Preliminary Financial Results**

(dollars in millions)	 Q1 2020		Q1 2019	CHANGE
Total revenues	\$ \$ 1,008.3		1,008.3 \$ 1,128.1	
GAAP restaurant-level operating margin	12.1 %		17.1%	(5.0)%
Adjusted restaurant-level operating margin (1)	12.5 %		17.1%	(4.6)%
GAAP operating income margin	(4.1)%		7.3%	(11.4)%
Adjusted operating income margin (1)	2.7 %		7.8%	(5.1)%

(1) See Preliminary Data and Non-GAAP Measures later in this release.

The decrease in total revenues was primarily due to: (i) lower U.S. comparable restaurant sales driven by the COVID-19 pandemic, (ii) domestic refranchising, (iii) foreign currency translation and (iv) the decrease in franchise revenues driven by the COVID-19 pandemic, partially offset by the net impact of restaurant openings and closures.

- GAAP restaurant-level operating margin decreased due to: (i) lower comparable restaurant sales and costs in connection with the COVID-19 pandemic, including relief pay, inventory obsolescence and incremental operating costs, and (ii) commodity and labor inflation.
- The primary difference between GAAP and Adjusted restaurant-level operating margin is that adjusted restaurant-level operating margin excludes the negative impact of inventory obsolescence and spoilage costs associated with COVID-19.
- GAAP operating income margin decreased due to: (i) restaurant-level operating margin discussed above, (ii) asset impairment charges
  related to the COVID-19 pandemic and (iii) the impact of restructuring and transformation initiatives. These costs were excluded from
  our adjusted operating income margin.

#### First Quarter Preliminary Comparable Restaurant Sales

Comparable Restaurant Sales information in the following table remains unchanged from the information provided in our May 5, 2020 Press Release.

	EIGHT WEEKS ENDED	FIVE WEEKS ENDED	THIRTEEN WEEKS ENDED
Comparable restaurant sales (stores open 18 months or more):	FEBRUARY 23, 2020	MARCH 29, 2020	MARCH 29, 2020

NM Not meaningful.

(1) Brazil comparable restaurant sales are on a one-month lag and are presented on a calendar basis. Represents results through February 29, 2020. Brazil's First Quarter comparable restaurant sales do not include any material impact from the COVID-19 pandemic. Most of our Brazil restaurants are currently open for offpremises only.

#### **Strategic Alternatives Review Update**

In November 2019, we announced that we were exploring and evaluating strategic alternatives that have the potential to maximize value for our stockholders. In February 2020, in connection with our year-end earnings release and conference call, we provided an update on that process and discussed certain actions that we planned to take. While we have implemented the 2020 cost savings measures described at the time and remain committed to our plan to support a growth-focused, operations centric organization over the long term, we have suspended further activity with respect to the strategic review process as we prioritize our response to the COVID-19 pandemic. This includes a suspension of discussions with interested parties with respect to our Brazil business.

#### **Conference Call**

The Company will host a conference call today, May 8, 2020 at 8:30 AM EST. The conference call will be webcast live from the Company's website at <a href="http://www.bloominbrands.com">http://www.bloominbrands.com</a> under the Investors section. A replay of this webcast will be available on the Company's website after the call.

#### **Preliminary Data**

The unaudited data presented in this release is preliminary, based upon certain management estimates and subject to the completion of our procedures for the preparation and review of our quarterly financial statements. We have not completed our final closing procedures related to our analysis of goodwill, intangible assets and certain other long-lived assets for impairment and the related income tax provision adjustments that may result from completion of such procedures. In addition, estimated cash burn data has been provided to help investors understand and assess the near-term impacts of the COVID-19 pandemic, but is subject to variability and may not be indicative of our results or trends for any full reporting period.

#### **Non-GAAP Measures**

In addition to the results provided in accordance with GAAP, this press release and related tables include certain non-GAAP measures, which present operating results on an adjusted basis. These are supplemental measures of performance that are not required by or presented in accordance with GAAP and include the following: (i) Adjusted restaurant-level operating margin, (ii) Adjusted income from operations and the corresponding margin, (iii) Adjusted net income, (iv)

Adjusted diluted earnings per share, (v) Adjusted segment restaurant-level operating margin and (vi) Adjusted segment income from operations and the corresponding margin.

We believe that our use of non-GAAP financial measures permits investors to assess the operating performance of our business relative to our performance based on GAAP results and relative to other companies within the restaurant industry by isolating the effects of certain items that may vary from period to period without correlation to core operating performance or that vary widely among similar companies. However, our inclusion of these adjusted measures should not be construed as an indication that our future results will be unaffected by unusual or infrequent items or that the items for which we have made adjustments are unusual or infrequent or will not recur. We believe that the disclosure of these non-GAAP measures is useful to investors as they form part of the basis for how our management team and Board of Directors evaluate our operating performance, allocate resources and administer employee incentive plans.

These non-GAAP financial measures are not intended to replace GAAP financial measures, and they are not necessarily standardized or comparable to similarly titled measures used by other companies. We maintain internal guidelines with respect to the types of adjustments we include in our non-GAAP measures. These guidelines endeavor to differentiate between types of gains and expenses that are reflective of our core operations in a period, and those that may vary from period to period without correlation to our core performance in that period. However, implementation of these guidelines necessarily involves the application of judgment, and the treatment of any items not directly addressed by, or changes to, our guidelines will be considered by our disclosure committee. You should refer to the reconciliations of non-GAAP measures in tables four, five, and six included later in this release for descriptions of the actual adjustments made in the current period and the corresponding prior period.

(1) During the thirteen weeks ended March 29, 2020, we borrowed \$376.0 million, net of repayments, on our revolving credit facility.

(2) The change in net working capital (deficit) during the thirteen weeks ended March 29, 2020 is primarily due to cash proceeds from borrowings on our revolving credit facility with the corresponding liability recorded as Long-term debt, net on the Company's Balance Sheet. We have, and in the future may continue to have, negative working capital balances (as is common for many restaurant companies). We operate successfully with negative working capital because cash collected on Restaurant sales is typically received before payment is due on our current liabilities, and our inventory turnover rates require relatively low investment in inventories. Additionally, ongoing cash flows from restaurant operations and gift card sales are typically used to service debt obligations and to make capital expenditures.

(1) The table set forth below titled "*Restaurant-level Operating Margin Adjustments*" provides additional information regarding the adjustments for each period presented.

(2) The following categories of our revenue and operating expenses are not included in restaurant-level operating margin because we do not consider them reflective of operating performance at the restaurant-level within a period:

(i) Franchise and other revenues, which are earned primarily from franchise royalties and other non-food and beverage revenue streams, such as rental and sublease income.

- (ii) Depreciation and amortization which, although substantially all of which is related to restaurant-level assets, represent historical sunk costs rather than cash outlays for the restaurants.
- (iii) General and administrative expense which includes primarily non-restaurant-level costs associated with support of the restaurants and other activities at our corporate offices.
- (iv) Asset impairment charges and restaurant closing costs which are not reflective of ongoing restaurant performance in a period.

*Restaurant-level Operating Margin Adjustments* - Following is a summary of unfavorable (favorable) restaurant-level operating margin adjustments recorded in Other restaurant operating expense (unless otherwise noted below) for the following activities, as described in table five of this release:
